### RICHARD 'MARCO POLO'...

The media will be searching for superlatives.

For Richard Milhous Nixon, his wife, a small entourage of advisors and some 83 correspondents will breach the China Wall, the inner-city of ancient China and the cloistered bastion of Asian communism.

This feat at least qualifies the President as a modern Marco Polo, whether or not substantive developments derive. Polo, the 13th Century Venetian traveler, spent years following the trade trails between Chinese city states and the Middle East. President Nixon follows a trail less exotic than the spices and silks and jade hauled along the routes Polo opened to the West. It is easily more historic.

Henry Kissinger set the stage in July, 1971, meeting Chou-en-lai, premier under Mao-Tse-Tung, to arrange this conclave.

Bi-partisan leadership wished Mr. Nixon well. He set down in Hawaii for a couple of days and again at Guam before winging on to Peking. These pauses are bi-purpose: it allows one's system to adapt to the difference of 13 hours between Washington and China and it allows President, press and party to consume vast detail about the new China emerging, as far as we are concerned, from about 2,000 years of obscurity.

One trail the President follows is the course of Japanese conquest in China which began in 1931 and ended with the U. S. atomic bomb at Nagasaki, Japan. Now our allies, the Japanese connection and influence are anathema to China, before and after Mao communism took over in 1950.

Marco Polo had only to worry over caravan bandits and the possibility of a slip of protocol at some Chinese dynastist's court. But perhaps like Mao and Chou, the Chinese emperors 800 years ago were curious about the barbarian's inquiries from the West and wished to exorcise him a bit and impress him with the splendors of the East. Polo dutifully kept a journal all the years of his travels, published later after

returning to his Italian city state.

The President will see an immense land, whose approximate \$126 billion gross national product will zoom in the next 20 years. Three quarters of a billion Chinese are caught up in the enigma of going Western in industry and development, but retaining a distrust of the fountain-head of the industrial revolution.

Mr. Nixon is president of the most successful nation of the West's fountainhead. And in his mind, he must wonder beyond the protocol and pragmatism preceding him, what sophistry may emanate from Mao and his "man of all seasons," Chou-en-lai.

Marco Polo drew welcome because he was an observer, a reporter and interpreter among the splendor of dynastic China. President Nixon draws welcome in rapprochement with Red China and, quite likely, in some obscure hope among these giants of 750 millions, that a U. S. "journey for peace" may become a ploy for greater Chinese influence among communists and West.

This is anticipated by the Sino experts in this country. The President is not traveling this "highroad" blindfolded. He says he expects no great results other than opening of communications. Scottie Reston the New York Times columnist and editor, hopes for greater things, because of what it could mean to the rest of us.

But the dilemma of Presidents and explorers is they are first to deal with new areas or new problems. We writers and editors and citizens can hope and conjecture and even live with what comes of their activity but we know too little about what they may encounter.

In the case of China, most Americans know they invented gunpowder and some know they invented movable type. Most Americans know they are communist and have heard of the China Wall. But beyond that, China is as obscure to us as it was to Marco Polo.

The President, amidst this obscurity and all the superlatives, must find his own way, while the press tries to describe it.

## School Trustees Approve Contracts For Principals

Cameron school trustees approved new three-year contracts for Don Wiggins, junior high principal, and John Chubb, high school principal, during a regular meeting Thursday evening.

The contracts were approved during an executive session called at the close of the meeting.

Trustees also voted to bring the new high school head coach, Ed Cauley, into the system April 1, if he can get a release from his school contract at Killen.

In other business, the school board approved purchase of \$10,000 of the school's own bonds, bringing the total of school-owned bonds to \$100,000. This leaves the schools with only \$165,000 bonded indebtedness.

Trustees also approved the payment to school personnel of retroactive back pay unfrozen by the Price Commission. The back pay will be included in February pay checks.

The building and planning committee will start a series of meetings for discussion and decisions on the school's building and improvement plans.

Trustees also named Felix Matula Jr. as election judge in the April 1 trustee election.

## Verdict Withheld In Youth's Death

Justice of the Peace Jim Swanzy is withholding verdict in the death of a 17-year-old youth found dead Thursday afternoon.

Charles Ray Sims of the Two Mile community was found dead by his 10-year-old sister about 200 yards from his home in a wooded area. He was found sprawled across a foot tub containing about a pint of gasoline.

Justice of the Peace Swanzy and Deputy Sheriff Vernie Miller were called to the scene about 4:45 Thursday. It is thought the youth had been dead 24 to 26 hours before being found.

The body was taken to Phillips and Luckey Funeral Home in Rockdale.

## County Equalizes Constable Pay

County Commissioners meeting Thursday equalized pay for constables in Milam County, setting a salary of \$100 per month for each constable effective January 1, 1973.

In other business Commissioners accepted the low bid of Galtier Motor Co. for two 2-ton trucks for Commissioners Pet. 3.

## Highway Patrol Reports Accidents

The Texas Highway Patrol investigated 16 accidents on rural highways in Milam county during the month of January, according to Sgt. G. E. Simmons, Highway Patrol Supervisor of this area.

These 16 accidents have resulted in 2 deaths and 5 injured for the first month of 1972.

## '71 Ag Income Down

Farm income in Milam County dropped \$1.3 million in 1971 following a record gain in 1970, according to a yearly report released by a special committee representing county farmers and ranchers, USDA, and Texas Power and Light Co.

Crop income was down \$1,518,045 from 1970 figures and government payments were \$639,060 below 1970 totals. Bright spot in the agriculture picture for Milam County was livestock where actual income was up \$771,056.

**CROPS**  
Although the total crop picture was off, cotton, fruits, vegetables and hay showed substantial gains.

With 34,000 acres of cotton harvested, income from the crop was up \$223,935 over 1970. Average yield per acre was 257 pounds of cotton lint and 8,738,000 pounds sold for \$2,359,260. Cotton seed added \$394,400.

Twenty thousand tons of hay brought \$600,000, up \$200,000 and 1,200 bushels of sorghum sold for \$30,000.

Fruits and vegetables added \$297,000 to farm income. Peanuts were the big crop with 1,400 acres harvesting 42,000 bushels at \$189,000. Tomatoes brought in \$50,000 and melons \$8,000.

Most disappointing was the pecan crop with an income of \$50,000, down \$300,000 from 1970. Historically, in-

come from pecans has fluctuated in Milam County although agriculture officials contend that if it were treated as a regular crop with proper tree care it would bring a \$3 million annual income.

Honey sweetened the crop tally by \$24,000 from 200,000 pounds sold. Corn and sorghum sales totaled \$2,485,000. Corn sales were down \$62,500 and sorghum was off \$1,395,000 from 1970 sales.

**LIVESTOCK**  
Leading the increase in 1971 sales of livestock and livestock products were some 14,500 head of "fed" cattle. At an average of \$40 per head sales totaled \$580,000.

Beef cattle sales totaled \$1,500,000 at an average price of \$200 for an increase of \$465,000 over 1970 figures. Average price per head was up \$50. Breeder cattle sales totaled \$150,000.

Calf sales (except dairy) were \$4,500,000 up \$300,000 at an average price per head of \$150. Forty thousand hogs were marketed for \$1,600,000 up \$100,000. Average price paid was \$40.

Sheep and lamb sales were \$18,000 down \$18,000 from 1970. Wool sales declined to \$360 from \$1,650 in 1970 and \$2,466 in 1969.

Poultry sales were off with income from hens set at \$44,000; pullets at

\$60,000; chicks at \$463,896; and turkeys at \$630,000. The county marketed 176,000 hens and 40,000 pullets, 2,577,200 chicks and 180,000 turkeys.

The market price for eggs was down an average \$6 per case and income on 90,750 cases totaled \$816,750, down \$36,300 from 1970.

Milk sales were stable at \$747,489. Recreational leases brought in \$30,000 extra income for county land owners.

**GOVERNMENT PAYMENTS**  
Government payments were down \$639,060 during 1971.

Upland cotton payments led the total of \$2,083,420 received by county farmers in 1971 with a figure of \$1,114,005. The feed grain program was second with a total of \$733,126.

Income from other government payments included: \$105,000 under the Rural Environment Assistance Program; \$2,479 for wool and lamb application; \$120,000 for Cropland Adjustment Program; and \$7,810 under the wheat program.

Members of the survey committee compiling the 1971 report were Monroe Fuchs, Wally Eldridge, Joe Glaser, John A. Smith, Gus Elley, Anton Anderle, Robert Clark, Bill McCutchen, John Snell, Henry Ivey, Wayne Mann, Douglas Buck, J. D. Moore and Wayne Blaylock and Jerry Singleton of Texas Power and Light Company.

## New Quarter System Approved

**AUSTIN**  
Tentative guidelines for changing the Texas public school academic year semester to the new quarter system were approved February 12 by the State Board of Education.

The quarter system, which becomes mandatory in September, 1973, will be optional during the 1972-73 school year.

A number of school districts are expected to pilot test the new plan either with selected schools or certain groups of students beginning next September. Texas Education Agency officials said Guidelines which will incorporate results of these pilot programs into the statewide format will be distributed to all districts early in 1973.

Under the new system authorized by the 62nd Legislature during its 1971 regular session, Texas schools will be required to divide their 180-day school year into three quarters instead of two semesters. A school district may also operate a fourth quarter if it chooses, paying for the extra time out of local tuition charges or tax funds.

Most Texas districts are expected to offer three quarters of instruction, at least during the first year. State funds allocated to districts under the Foundation School Program will cover only the usual 180 days of instruction plus 10 days for teacher inservice training.

Texas high schools (grades 9-12) will have two options in meeting accreditation standards. They may grant credit under the current semester unit plan but extend the instruction time spent daily or weekly in a course. Or, they may grant credit on a quarter unit plan which would, in effect, grant less credit for fewer hours of instruction.

Detailed definitions in the new guidelines will allow more flexible scheduling of students for individualized instruction, continuous progress programs, and still assure an adequate number of hours for class work, according to Charles Nix, Texas Education Agency associate commissioner.

Nix, who heads the Agency's office of planning said a special task force has spent some 800 man hours developing the new guidelines.

"We have looked at the results of

quarter system or other year-round school plans from all sections of the country in order to try to find the best methods and avoid the pitfalls," Nix said.

"Members of our task force included experienced professionals from a number of departments within the Texas Education Agency. We have also met with school administrators and teachers at major conferences and at small informal gatherings in all sections of the state in order to get their viewpoints and

suggestions for implementing the new plan.

"This foundation work has taken time, but we believe it will save more time and avoid a number of mistakes in the long run," Nix added.

Moving to the quarter system may have little effect on elementary schools, particularly in districts which operate only three quarters. Time for reporting to parents, however, may be adjusted to coincide with the secondary schools.

## Barnes To Make Whistle Stop Here

The "Ben Barnes Victory Special" will stop in Cameron at 8:35 a.m. Thursday as the Lieutenant Governor whistle-stops his way across Texas on a three day tour.

Three members of the world champion Dallas Cowboys -- Bob Lilly, Walt Garrison and Dan Reeves -- will be among the celebrities on the train.

Barnes will open the tour with a rally at 7:15 a.m., Tuesday, February 22 in Amarillo and end it late Thursday in Houston.

Approximately 30 stops are planned along the way.

"This is my way of bringing the campaign for Governor to the people," Barnes said, adding, "I want to look Texans in the eye and tell them how I stand on the issues in this Governor's race."

Mrs. Nancy Barnes will be aboard the train with her husband.

Also aboard the four-car special will be dozens of newsmen, radio and television reporters and other members of the media from throughout Texas.

This is the first time a candidate has whistle-stopped the state since former Governor John Connally did it in 1962 and former President Harry Truman in 1948.

The train will make overnight stops at Brownwood and Temple enroute to Houston.

BEN BARNES

## Area Roundup

### Regional Prison Studied

McLennan County may become the site of a \$3 to \$5 million regional prison unit that would be the nation's first "truly correction institution," mainly for young people. Experts from the Criminal Justice Council and Texas Department of Corrections will be in Waco Tuesday to discuss the project.

### Three-Man Race Develops

A three-man race for an east side city council spot developed in Rockdale with incumbent E. E. Henry being challenged by H. D. Maxwell and Rev. George Doss. Filing for new terms were Mayor Harold M. Luckey and west ward councilman Frank Huder. Both are unopposed so far.

### Financing Hearing Set

A public hearing on financing of public education in Texas will be held at 1 p.m., Feb. 25 on the Temple Junior College campus. The House of Representatives special interim committee on financing of public education will hold the hearing.

### Snook Votes To Incorporate

The voters of Snook have approved the incorporation of the town by a vote of 65 to 17. The approval of the voters to create an incorporated town will result in the calling of another election soon to elect a mayor, five councilmen, and a town marshal for the town. The new town is expected to seek federal aid to provide a sanitary sewer system to serve the community after its council and city officers are elected.

## Getting To Fires

Milam County Commissioners are getting at the problem of rural fires by placing money with newly acquired equipment at Minerva Fire Dept., which is halfway between Cameron and Rockdale.

Both communities had asked for considerable increases in annual support for rural fire calls answered by Rockdale and Cameron departments.

If rural fire fighters can handle the problem, the fire departments of Rockdale and Cameron won't have to make the long runs which, if serious, call out more equipment and jeopardize fire safety in the two larger towns. Grassfires and such on the

fringes of either communities or major disaster fires would be answered anyway. It is the long-run fires well into the county which are costly to both Milam small cities and ones which they deserve reimbursement for, or in the case of Minerva or Milano or other community center, deserve help with.

These moves are a step in the right direction. The problem of fighting fires, whether grass or major buildings, will grow as construction gains in Cameron in this new era or increases in Rockdale.

More than half of the county's population lives in the two towns.

## Milano Water Corp. To Expand

The Milano Water Supply Corporation held its annual meeting last Tuesday evening, and during a two hour session the members voted to grant the Board of Directors authority to borrow \$310,000 in a loan for new pipeline construction that will more than double the size of the present water system and the number of its customers.

A record turnout, estimated at over 250 members, jam-packed the Milano High School Cafeteria where the meeting was held.

In addition to the loan authorization, the members voted some changes in the Corporation's by-laws, and also to increase the Board of Directors from five to nine members.

The funds from the loan will be used to pay for extension of the company's water lines in the south Milam area which the members voted to approve during their annual meeting last year. An engineer's report of the project has been completed and approved by FHA supervisor Henry N. Ivey in Cameron and by the FHA office in Austin. The new pipelines will be in two sections. One of them will run from the pumping station in Milano east along Highway 79 to near Gause. The other, a longer line, will parallel Highway 36 south into an area near Chriesman to serve a large number of customers in that section.

The new lines, when completed, will be approximately 80 miles long and will serve more than 200 new customers.

The new construction will more than double the size of the present water system, which serves Milano and vicinity, and has a line extending west along Highway

79 and north on Highway 36 into the Griffin Chapel area, and serves 195 customers. Water rates for customers on the new lines were set at \$8.00 per month for the first 3,000 gallons used; however, it was expected this charge would be reduced to \$5.50 minimum now paid by old members at an early date in the future.

Highlight of the meeting was the vote for the four new members of the Board of Directors of the Corporation. A resolution was first made to re-elect the present five members on the Board for another one year term and members voted approval. Then from eight names that were nominated, the members chose four new directors. Winning the new posts were Ray Whited, H. G. Hughes, Mrs. C. O. Garretson and Lee Keen.

Old Board members that were voted another term were: L. E. Love, President, J. C. Hayman, Secretary, O. T. Bullock, Frank Nelson and E. C. Westbrook.

During the meeting members heard a report from J. C. Hayman, Secretary of the Corporation showing it was in good financial condition despite some expense involved in repairs to an old pump and replacing it with a new one.

Hayman reported that the Corporation sold 11,445,700 gallons of water during the year, 1971. Water sales amounted to \$13,859.95, and total water revenue, including other sources, was \$16, - he said, were \$15,403.81. More than half of this -- \$8,932.08 -- was paid to the FHA to cover both principal and interest on the Corporation's loan.

His report also showed that the corporation, as of

December 31, 1971, had reserve funds amounting to \$7,000. In certificates of deposit and \$984.24 in savings accounts in a bank. Also there were funds amounting to \$2,431.13 in its checking

account.

He stated that the Corporation during 1971 gained 16 new members as customers lost 2, and presently has 195 customers being served by the old water system.

### RIVER STAINS

The Zaire River in Africa, formerly known as the Congo, empties 1,400,000 cubic feet of water into the Atlantic Ocean every second, the National Geographic Society says. The discharge stains the ocean brown for 30 miles out to sea.

**Congratulations. You just saved \$5 by doing your own income tax. And all it cost you was three long, sleepless nights.**

**And a slight case of heartburn.**

If you had gone to H & R Block, on the other hand, you could have relaxed while someone else figured out your return. Quickly and confidentially. Probably unlike any way you've ever done it before.

And, when you figure your own, you may be entitled to deductions you're not taking and taking deductions you're not entitled to. For instance, do you know all about deductions for child care or casualty losses? Or, that if your income increased over the last few years, you may save tax dollars by "income averaging"? And even if you did, would you know how to go about "income averaging" to begin with? Probably not. And there's no reason why you should. After all, you're an amateur when it comes to doing income tax.

You see, when it comes to income taxes, amateurs should depend on H & R Block. We have over 6,000 conveniently located offices manned by thousands of specially trained personnel. They're warm and friendly people who are anxious to help you. They'll sit you down over a free cup of coffee and show you some things about

your income tax that you might never have known existed.

Furthermore, if your return is audited, we will accompany you, at no extra cost, to the Internal Revenue Service and explain how your return was prepared, even though we will not act as your legal representative.

This means that H & R Block is ready to offer you year 'round tax service for just one low fee a year, with no extra charge for audits and estimates.

H & R Block's charges start at \$5 and the average cost was under \$12.50 for the 7 million families we served last year.

Which is somewhat less than what you paid. Not to mention the fact that aggravation isn't tax deductible. And we are.

**DON'T LET AN AMATEUR DO H&R BLOCK'S JOB.**

**H&R Block.**  
The income tax people.

## New Street Requests...

City Council continues to hear requests for paving and curbing streets. It is recognized these facilities are necessity, not luxuries.

The City's current good financial condition makes it possible to include additional paving, with participation by property owners. Cameron is able to maintain a program

because of sound management through the years.

As jobs, housing and facilities increase in Cameron, the tax base, both sales and property, will grow with it.

And though it may take some time, the additional streets, which make a town a small city, will be built.

## The Diplomatic Pouch

Washington, D.C. -- The following letters were recently answered by the Department of State:

### FREEDOM FIGHT

Can the U.S. Government use its influence in bringing the plight of the Baltic nations to the attention of the United Nations?

O.J.K.  
Altadena, Calif.

Dear O.J.K.:

We appreciate the concern which underlies the appeals made by the Americans for Freedom of Captive Nations and the Baltic Freedom Rally, because we deplore the abuses of human freedoms which have characterized Soviet rule.

However, whatever steps would be appropriate for us to take in the future in the United Nations General Assembly or in other United Nations organs must take into account that the possibilities for action in the United Nations are limited, particularly from the point of view of their effectiveness in inducing the Soviet authorities to change or ameliorate conditions in the United Soviet Socialist Republic.

We must realistically recognize that in the present circumstances it would not be helpful to the cause of the Baltic states if we precipitated a voting confrontation in the United Na-

tions. The result of such a confrontation would be likely to prejudice the standing of those who hope for the restoration of the right of self-determination for the Baltic peoples, as well as our ability to continue to advocate their cause most effectively.

Denials of human rights are of concern to us, and we have under constant review those steps we may take in the United Nations to counteract Soviet violations of accepted human rights.

### MIDDLE EAST POLICY

What is our current policy in the Middle East?

J.J.M.  
Cleveland, Ohio

Dear J.J.M.:

United States efforts in the Middle East are currently focused on helping to achieve an interim Suez Canal agreement based on the reopening of the Canal and military disengagement there.

Both Israel and Egypt continue to be interested in an interim canal agreement and both have asked us to continue our efforts to bring about such a settlement. Although there remain substantial unresolved differences between the parties, we believe that a basis for future progress toward an interim settlement can be achieved. We find that in certain respects there are parallel attitudes between the parties. We are also

encouraged that the ceasefire resulting from the U.S. Middle East initiative of June 25, 1970 remains in effect, after more than 13 months.

We remain in active contact with the parties, and intend to pursue a very active program of discussions between now and the end of the year to see if we can play a useful role in bringing about an interim settlement. We believe an interim Suez Canal settlement continues to be the best way to assure that relative quiet will continue and spare people of the area the anguish and heartbreak of loss of lives. The United States will continue its efforts to achieve an interim Suez Canal settlement also because it would constitute a practical test of peace that, in time, could help move matters toward an overall settlement in accordance with the November 1967 resolution of the United Nations Security Council.

Do you have an inquiry about U.S. foreign policy? Send it to: "The Diplomatic Pouch" P/MS, Room 4831 Department of State Washington, D.C. 20520

## Rod Of His Anger Is Circle Study

"The Rod of his Anger" was the Bible study for the regular meeting of Circle 2 of the First Presbyterian Church.

Twelve members were present for the 3 p.m. February 14 meeting at the home of Mrs. Drayton McLane. A report of 7 visits were made by circle members.

Mrs. Harry Tag, circle chairman opened the meeting with a prayer and gave the devotional emphasis reminding members to mark special days. Miss Lenora A. Bickett gave the secretary's report and Mrs. Ladis Marek gave the Treasurer's report.

The Least Coin Lesson "Am I My Brothers Keeper" was given by Miss Bickett. Mrs. Tag gave the Bible lesson with scripture reading from Isaiah 10 verses 5-19.

During the social hour the hostess served refreshments in the dining room. Mrs. Tag presided at the coffee and tea service. Mrs. J. E. Johnson also assisted the hostess.

## 'Buttons And Bows' Fashion Show To Feature Trends For Spring

By Christine Laws

Spring is coming and lots of exciting fashions are waiting 'round the corner. It's time to think and plan. "What's ahead that's new and fun and right for me?"

For the trends and looks in fashions, come see "Buttons and Bows", the cotton fashion preview to be held February 26, 7:30 p.m. at the Methodist Fellowship Hall in Cameron.

The show is sponsored by the Milam County Farm Bureau, the Milam County Cotton Industry, and the Milam County Extension Service.

Clothes are being used from McIntosh's, Berniece's, Schmitt's, Penney's, Carousell, Thyra, Inc. all of Cameron, Mary Ann Shoppe, Aliene's Shoppe, and Mehaffey's all of Rockdale, and The Sampler and Dyer's of Temple.

Approximately forty-five models will show clothes for all ages from 18 months to grandmothers and grandfathers. Clothes will run the gamut from swimwear to lingerie, to sports, school, work, party, church, and evening wear.

Both men and women, boys

and girls, and children's clothes will be featured. All clothes shown will be of cotton and cotton blends.

Here are the trends - pick from them, interpret them in fabrics and colors of your choice, and create a springtime image that's you and only you.

Come see the Fashion News for Spring and Summer 1972. Be cool, comfortable, and carefree in Cotton Fashions this year. There is no charge for the program and it is open to the public.

FLAG centerpieces for the Arts and Service League's luncheon "Passport to Pleasure" are shown by Mrs. Bill Dase, decorations chairman, (center) to Mrs. Bernay Dusek, League president and Mrs. Ed Magre, luncheon chairman. Flags and flowers will also

be combined in the head-table centerpiece which will be given as a door prize following the luncheon. Deadline for purchasing tickets to the March 1 luncheon is Thursday, February 24. They are on sale from League members or at Berniece's for \$2.50.

## Easy Sweet-Sour Sauce For Party Dip

Dinner parties often are easy-planning until the cook tries to think of new and different appetizers. If she's clever, she'll use what she has on hand to make a Sweet-Sour Dipping Sauce for fried shrimp, egg roll or bacon-wrapped chicken livers.

Then if she needs a second before-dinner delicacy, she might heat frankfurter nuggets in Currant Glaze, again using kitchen-handly foods. In both recipes preserves are called upon, for their goodness extends way beyond breakfast toast or coffee-time muffins.

Apple jelly "makes" the dipping sauce and currant jelly partners with salad mustard to glaze the franks. You'll see—at your very next party.

### Sweet-Sour Dipping Sauce

1 tablespoon salad oil 2 tablespoons vinegar  
1 clove garlic, minced 1 tablespoon soy sauce  
¼ cup sliced green onions 1 teaspoon ground ginger  
1 (10-ounce) jar apple jelly

Combine oil, garlic and onions in saucepan; cook over low heat for a few minutes. Add jelly and remaining ingredients; bring to boil and cook 3 minutes. Cool; serve slightly warm with fried shrimp, egg roll or bacon-wrapped chicken livers. Makes 1 cup.

### Currant Glazed Appetizer Franks

1 (10-ounce) jar currant jelly  
1 pound cocktail franks or sliced franks  
1 (6-ounce) jar salad mustard (¾ cup)

Heat jelly and mustard together, stirring occasionally, until blended. Add franks and heat. Serve with picks. Makes 8 servings.

## Russians Say 'Nyet' To Women Athletes In Manly Sports

By Chris Catlin  
Reuter Correspondent

MOSCOW  
It might come as a shock to two-time Olympic champion Tamara Press, but Russians are starting to call putting-the-shot unladylike.

A few years ago, when sex tests were introduced for international women athletes, the question might have been too hot for Soviet newspapers to handle.

Now, in one of the mini-controversies that flare up occasionally in the official-ly-controlled press, people are asking which sports are really suitable for women -- and which are not.

It started when football -- one of the last remaining male bastions in this country where women often sweep streets and drive buses -- came up with two women's teams in the Ukraine.

The weekly newspaper Nedelya startled readers by reporting the match and sup-

porting the idea of women's soccer.

"Women in our country have tried to play football before. But how many sceptical -- and even angry -- voices were heard? Now women's football is popular in many countries. Maybe we should support it too."

This was too much for at least one sporting commentator, who countered in the weekly literary gazette: "The fact that ladies play football abroad should not capture our rich imagination. Abroad, even wrestling flourishes as a women's sport."

And not content with scoffing at women's soccer, columnist Vitali Reznikov went on to quote communist philosopher Karl Marx and the Bible in arguing that sport should be compatible with femininity.

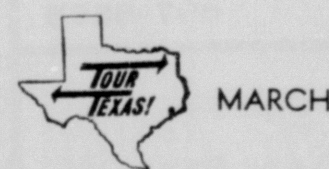

"In a word, dear comrades -- render unto Caesar the things that are Caesar's, and to God the things that are God's. Better let only men step into the circle and put the shot as far as they are able," he wrote.

Even Marx, Reznikov recalled, had once written that the thing he appreciated most in a woman was weakness. Which was, he hastened to

add, Marx's way of saying "femininity."

Casting the international amateur athletics federation as villain of the piece -- for an alleged lack of humor and proportion in calling the shot a women's sport -- Reznikov also jibbed at the discus-throwing and the 1,500 meters race. "The whole thing just isn't for women."

Others went further, like Valeri Brumel, a former world high-jump record holder and one of this country's most respected sporting figures.

March 10-12 Sweetwater Jaycee's 14th Annual Rattlesnake Round-up. Billed as the world's largest, this event and its sister event, The Gun and Coin Show sponsored by the Sweetwater Rifle and Pistol Club, is expected to host 13,000 visitors. Spotlights are the snake hunt, snake steaks and snake dance. In 1970, a "banner year," 9,017 snakes were weighed in (8,886 pounds of them) with the first place winner accounting for 1,422 pounds. There are guided tours for spectators and photographers.

### CARD OF THANKS

We wish to express our sincere appreciation and gratitude to the many relatives, friends and neighbors for the many acts of love and kindness extended our dear and precious Mollie during her illness. We thank you for the many visits to the home and hospital, cards, food, flowers and other gifts. Especially are we thankful to the doctors and nurses at Scott & White Hospital, Father Rosendo Rafael for his many visits to the home and hospital, to all who helped sit with Mollie day and night for two weeks, Gommert's Funeral Home, Pallbearers, members of Cyclone St. Joseph Church, The Altar Society, SPJST Lodge 24 Cyclone, Leedale Home Demonstration Club, Marak Friendly Club and Cam-Roc Bowling League. Also, we are grateful to all the ladies who donated, prepared and served the noon meal at the Parish Hall and to everyone for the many mass and floral offerings, prayers, sympathy cards and food. God bless you for being near and giving yourself and your time to express your love and sympathy.

## Delphian Program Is HD Review

Miss Christine Laws presented a program on Home Demonstration work in Milam County for the February meeting of the Cameron Delphian Club.

The club met Tuesday afternoon at the home of Miss Mildred Thornton.

Miss Laws, County Home Demonstration agent, reviewed the home demonstration program in Milam County from the early days of teaching canning methods to present projects in fashion and home decoration.

Roll call was answered with each member telling about a 4-H Club member in Milam County and their projects.

Following a business meeting the 18 members present enjoyed a cheese cake, tea and coffee. Mrs. Ray Jensen, Delphian Club president, presided at the silver tea service. Miss Laws served the cake.

## Births

Mr. and Mrs. Gene Addington of Rockdale announce the adoption of a daughter, Amy Elizabeth, born Jan. 7 at 5:40 a.m. weighing 6 pounds 10 1/2 ounces. Amy came to make her home in Rockdale on Jan. 20. Grandparents are Mrs. Morine Sanders of Cameron and Mr. Roy Addington of Rosebud.

To Mr. and Mrs. Roger Terry of Bryan, a boy, David James, 6 pounds 9 ounces, born Feb. 15 at 8:30 p.m. Grandparents are Mr. and Mrs. Bob Clements and Mr. and Mrs. James Terry. Great grandparents are Mr. and Mrs. Albert L. Glaser of Cameron and Mr. and Mrs. Charles Terry.

## Easter Seal Appeal Will Open Feb. 28

The 1972 Easter Seal Appeal will open in Milam County on Monday February 28, according to William Kelm, who serves as Easter Seal Representative for the county.

He said that Easter Seal Appeal letters would begin arriving at homes in the county about February 28.

As Easter Seal Representative Kelm, is the person to contact to request rehabilitation services from the Easter Seal Society for Crippled Children and Adults of Texas. These services include physical and occupational therapy, speech and hearing programs and special information services to help solve the many problems faced by the families of handicapped children and adults.

Last year over 22,000 handicapped people received help from the Texas Easter Seal Society. With the costs of providing expert professional care rising, more money that ever will be needed.

## College Note

Mrs. Rosalind Diane Botts Jones, daughter of Mr. and Mrs. Richard Keith Botts of 1302 North Travis, was admitted into the Sigma Tau Delta Society of Stephen F. Austin State University at Nacogdoches on January 25, 1972.

Sigma Tau Delta is a national English honor society dedicated to the critical study of English and American literature and language and to the encouragement of creative writing.

Before transferring to Stephen F. Austin with her husband, Charles E. Jones, who is attending Graduate School, Rosalind became a member of the Alpha Lambda Delta Honor Society of Howard Payne College at Brownwood. Presently, she is a senior working toward a Bachelor of Science Degree with a double major in history and English and a minor in Secondary Education.

### MOSAIC COPIES

Vatican artists make mosaic copies of many of the world's greatest religious paintings, National Geographic says. Beginning in the 16th century, the mosaics were used to replace fragile canvases damaged by years of candle soot and dampness. Today, the Vatican studio ships mosaic reproductions to many parts of the world.

If you're lucky, he may invite you in so you can see for yourself how it feels to be really warm... evenly warm, toes to nose... in gentle, quiet, clean, sunshine-like electric heat.

Neighbors who have it love it! And there are plenty of them—6 of every 10 new homes in TP&L territory are now all-electric with electric heating. And, more and more families in older homes are exchanging out-dated heating for the comfort of a modern, electric system.

Whether your home is new or long lived-in, there's an electric heating system for it. A TP&L heating specialist will help you choose. No cost or obligation. He'll gladly recommend Certified Electric Heating Dealers who can install it, too.

Your local Certified Electric Heating Dealer installs your system.

# THE INFORMED CONSUMER

BY CRAWFORD C. MARTIN  
Attorney General of Texas

There are many advantages in obtaining a lifetime membership. If you can't think of any, just ask

the salesman at some of the local health spas, dance studios, or athletic clubs. He will tell you that this form of membership conveys the highest status, insures maximum benefits to the purchaser, and constitutes the most economical form of membership.

But what are the disadvantages of the lifetime membership? A lifetime membership is only as good

as the company which stands behind it. The company may not remain in business throughout your lifetime and your membership then becomes a piece of worthless paper.

Every year businesses go bankrupt leaving people stranded with services they have paid for but cannot obtain. Even if they remain in business their facilities may be allowed to deteriorate. Another problem arises when the purchaser trans-

fers to another city and is unable to continue to utilize the facilities.

When purchasing a lifetime membership, you should consider the fact that after the "new" wears off, you may lose interest in the dance lessons or using the facilities at the health spa. A person who does not use the services purchased pursuant to a lifetime membership is not saving money, but instead, is wasting his money.

Consider whether or not you will be able to use the services you are purchasing. Consider the possibility of a shorter membership period such as one year. Be sure you have inspected the facilities to determine you will be satisfied.

Above all, don't rush into signing a contract just because the salesman is impatient. Make up your own mind, don't let the salesman do it for you. Remember, you can near-

ly always sign the contract tomorrow, but you rarely can relieve yourself of your obligations under a contract once it is signed.

Board-and-batten, popular outdoors, also makes interesting wall paneling.

## Pilgrimage To Mecca

Mecca, Saudi Arabia—(HK)—As instructed in the Koran—holy book of Islam—every Moslem should attempt at least once in his life to make a pilgrimage to Mecca, the city established as the religious center of Islam.

The pilgrimage ritual is performed during an extended season, concluding about the middle of Dhu al-Hijjah, last month of the year in the Arab lunar calendar.

On the ninth day of Dhu al-Hijjah, some 500,000 pilgrims gathered on the plain of 'Arafat,

where Mohammed delivered a famous sermon. On 'Arafat and at the Mount of Mercy nearby, pilgrims prayed all day facing this city as the prophet did. At sunset they returned to Mecca where, on the tenth day, they sacrificed sheep to commemorate the sacrifice by Abraham of a ram instead of his son Ishmael.

More rituals that day concluded the pilgrimage. The government of Saudi Arabia holds Mecca in trust for all members of the Islamic faith, sparing no effort or expense to ensure the comfort, safety and welfare of all pilgrims.

## Scientists Aim Forecasting Probe

By Peter Mosley  
Reuter Correspondent

HOUSTON Airborne scientists are pointing an array of space-age instruments at the clouds in an effort to make short-term weather forecasting something more than an educated guess.

The aim is to eventually equip weather satellites with electronic probes that could show whether a particular formation is a potential killer storm or just a passing cloud.

Present weather satellites can show the size, density, height and direction of cloud formations -- but they can't tell what the clouds contain.

Now a team of scientists armed with remote sensing instruments are flying at altitudes up to 45,000 feet to see if ice and water particles can be identified inside clouds and if the size and quantity of water droplets in a cloud can be measured.

"This sort of knowledge can tell the forecaster with substantially greater probability whether the cloud is a threat or not," said Dr. William Nordberg, chief of the Laboratory for Meteorology and Earth Science at the U. S. Space Agency's Goddard Space Flight Center in Maryland.

The cloud study project is being managed by the National Aeronautics and Space Administration (NASA). Using a NASA Convair 990 aircraft named "Galileo," the scientists have examined cloud formations off California and over the Pacific northwest.

They hope to be able to distinguish cloud particles by using infrared instruments to remotely measure variations in the reflection of solar energy and polarized light from the cloud. Then they will fly through the cloud and use a laser instrument to directly measure the particle size, concentration and distribution for comparison.

"If we can determine that a particular formation is ice clouds," Dr. Nordberg said, "then we need to know the size and the distribution of the ice particles to find out whether this is a rapidly developing front or an old front that will wash out very soon."

If the cloud has water droplets and they are very large, it means they have moved up very rapidly and there is strong convection. Small droplets mean fog, or that the cloud has been around for a long time and there has been stationary condensation.

"This is the very first field test of its kind. You can't create clouds in the laboratory, so we have to go and look at them, and we want to catch all types of formations."

"I think we have made a big breakthrough in short-term forecasting with the weather satellites. Short-term means we look at what the weather is doing today and say what it will do to-

morrow... basically, it's a very educated guess."

But Dr. Nordberg said that even with the benefit of cloud probing instruments, forecasters would still not be able to say with certainty whether Washington D. C., for example, was due for a snowstorm or heavy rainfall.

"That sort of thing might depend on a temperature difference of one degree in one particular area. I don't know if we'll ever know that much."

He said the cloud studies might also throw some light on the mechanics of a hurricane -- why one particular depression builds up into a great swirling storm while 90 per cent of similar looking phenomena dissipate harmlessly.

## World News

### RUSSIAN DRUNKS

Moscow, Reuter - Drunken drivers were responsible for a significant portion of serious traffic accidents in the Soviet republic of Georgia, where 455 people died on the roads in the first eight months of 1971, according to a local newspaper.

## Study Predicts Exhaustion Of World's Fresh Water

By Barry Moody

ROME

The world's total supply of fresh water could be exhausted by the middle of next century unless drastic conservation measures are taken.

This alarming prediction comes in a study by the United Nations Food and Agriculture Organization (F.A.O.) released here this month.

The study warns of the dangers to mankind if it fails to act quickly on a world-wide basis to preserve supplies of water.

Without water, a man can die within three to four days.

But the study is not all dire threat. It examines a large number of ways to deal with the situation, ranging from simple improvements in water use and re-use to methods of desalinating seawater and influencing the weather.

It also records a revolutionary plan that calls for a vast re-arrangement of the world's population and the division of its resources into three distinct functional regions.

The 62-page F.A.O. study, with contributions from the World Health Organization and the World Meteorological Organization, was prepared for the secretariat of the United Nations conference of the Human Environment due to meet in Stockholm in June.

The plan to rearrange the world's population and resources was devised by Greek regional planner Constantinos A. Doxiadis. He proposes the division of the earth into three regions -- natural, agricultural and urban.

The natural region would consist of a virtually uninhabited reserve of forests, deserts, mountains and plains covering about half the world's land surface. This would act as a vast watershed to produce the huge amount of water required by the other two re-

gions.

The agricultural region, occupying about 45 per cent of the populated area, would employ about two billion people in highly mechanized agriculture. They would produce all the food needed for a world population of about 21 billion.

The third region, called "ecumenopolis" -- university city -- would group about 19 billion people in about five per cent of the total liveable area, along the shores of the oceans, large lakes and rivers.

Doxiadis suggests that without such a drastic redistribution of population and resources, all conventional sources of fresh water would be exhausted by the middle of the 21st century.

The study says that at present man often damages water resources by unwise water development and management. This can lead to floods, droughts, erosion and the contamination of coastal fresh water sources.

The study says that present man only uses about 6.6 per cent of the world's total rain, snow and dew. The rest is lost through evaporation or when it runs into the oceans.

But it says that efficient water management and full utilization of the available resources is already within man's reach if he begins to apply the correct measures.

Possible conservation measures include the reduction of the present great loss of fresh water into the sea. The study mentions experiments in which water is covered with a layer of floating, non-contaminating chemicals that eliminate loss through evaporation.

Since 98 per cent of the earth's water is in the sea, effective desalination measures could obviously be highly important. The study says that such techniques are as yet too expensive to be practicable.

Artificial tampering with the weather to produce selective rainfall is offered as

another possible future measure to produce more water.

The study stresses the need for a change of attitude toward the use of water and the realization that conservation measures are urgently necessary.

"The living environment created by man is largely determined by the use of water. In view of the growing problems with water, the next 100 years may be a critical phase in man's existence on this planet," the study concludes.

### DOCTORS SMOKE POT

Brisband, Australia, Reuter - Hundreds of doctors in Australia are risking conviction and loss of license by smoking marijuana, according to an article in the latest issue of the Medical Journal of Australia.

## Former Spy Asks Back Pay

By Klaus Jonas  
Reuter Correspondent

BONN

A former German spy presumed executed by the British Eighth Army for espionage in Cairo in World War II has sent the West German government a bill for \$91,000 for back pay.

Hans Eppler, an Egyptian-German now living in France, is claiming pay for more than 29 years, starting in the early years of the war when he was taken on by the German Abwehr (counter-intelligence agency).

"I was never dismissed, therefore I am still employed," says the wealthy 57-year-old engineer, who is now married to the daughter of a millionaire French manufacturer.

He wants West Germany to pay up this war-time German debt because it claims to be the legal successor to Hitler's Third Reich.

To support his claim, Eppler sent a copy of his spy-contract to the interior ministry here, showing that he was employed by the Nazis on October 1, 1941.

The contract states in part:

"...Termination of this employment will be decided only by the office of foreign counter-intelligence, supreme command of the army."

However, Bonn finance ministry officials, who took up the matter, are dismissing his claims by saying that left-over obligations incurred by the Third Reich for the most part have been cancelled.

A ministry spokesman said: "An additional hitch in this case is that it is improbable that such a contract was ever signed. At any rate, it is most improbable that he still has claims today."

He said the whole matter had been referred to "an-

other agency."

Eppler, stepson of an Egyptian judge, had valuable war-time connections in Cairo. He was fluent in six languages and was told in 1942 to build up an agents network in the Egyptian capital.

His assignment was short-lived. He and his radio operator were arrested by British forces, convicted of espionage and condemned to death.

Herr Eppler says his sentence was later suspended on the ground that he was born in Egypt, and he was locked up in a top-secret prisoners camp near Cairo.

In Berlin he was declared dead by the Nazi Abwehr and his wife received a death certificate and war widows benefits. She married before the war was over.

Eppler says he is not fighting for the money now but for a principle.

### FUR SURVEY

Morges, Switzerland, Reuter - The international fur trade federation is to help finance a survey of leopard and cheetah populations in Africa to ensure that the species will not be wiped out, the World Wildlife Fund announced here.

KENNETH DOSKOCIL

KENNETH DOSKOCIL

LAREDO

Second Lieutenant Kenneth L. Doskocil, son of Mr. and Mrs. Joe L. Doskocil of Rt. 1, Burlington, has entered U. S. Air Force pilot training at Laredo AFB, Tex.

Lieutenant Doskocil will fly the newest Air Force jet trainers and receive special academic and military training during the year-long course. He will be awarded silver pilot wings upon completion of the Air Training Command flying program.

The lieutenant, a 1967 graduate of Rogers High School, received his B. S. degree in industrial technology in 1971 from Texas A&M University. He was commissioned there upon completion of the Air Force Reserve Officers Training Corps program.

His wife, Arlene, is the daughter of Mrs. Elizabeth Entrop of Rt. 2, Lott.

## College Notes

Charles Lawrence Hollas of Cameron was one of 154 students awarded doctoral degrees from the University of Texas Graduate School at the close of the fall semester.

JAMES WRIGHT

KALMATH FALLS, Ore. — U. S. Air Force Staff Sergeant James C. Wright, son of Mrs. R. K. Wright, 1402 W. Eighth St., Cameron, and his co-workers recently were named the 1971 honor flight in the 827th Air Defense Group's Security Police Section at Kingsley Field, Ore.

Members of the winning group -- identified as "Phantom" flight -- earned monthly honors seven times during 1971.

Sergeant Wright and members of his flight were cited for job knowledge, response to primary security alert team situations, appearance while on duty and maintenance of vehicles, equipment and buildings utilized.

The sergeant is a 1962 graduate of O. J. Thomas High School. His wife is the former Elsie T. Kaesbauer.

## Rogers Schools Name Class Favorites

The Rogers Public Schools announces the election of class favorites for the 1971-72 school year. In elementary grades they are:

Miss Asher, Tal Ashcraft and Tammy Schiller; Mrs. Nabours, Kelly Andell and Pete Martinez; Mrs. Akin, Sherry Gommert and Randy Lesikar; Mrs. Starnes, Kim Mathis and John Abbot; Mrs. Perkins, Karen Williams and Terry Coots; Mrs. Agee, Shirley Sebesta and Leland Jungmann; Mrs. Richter, Tammy Williams and Kyle Mathis.

Eighth grade favorites in junior high are Marian Doskocil and Brian Grygar; seventh grade, Lisa Godwin and Ronnie Skala; sixth grade, Becky Driver and Mitch Mason.

High school favorites are: freshman, Kasey Maynard and Russell Psencik; sophomore, Barbara Sulak and Tommie Sulak; junior, Madolin Schneider and A. J. Stermer; senior, Beatrice Brenek and Danny Henson.

## Mrs. Cowen Gets Life Membership

ROGERS

Mrs. Ada Jean Cowen, a junior high school and elementary teacher in the Rogers Public Schools for the past 34 years, was awarded the Life Membership in the Texas Congress of Parents and Teachers Monday night (Feb. 14) by the Rogers P. T. A. This is an annual presentation of the local PTA unit since 1958. Mrs. Floyd Frits was assisted by Mrs. Jerry Lesikar and Mrs. Ernest Schiller in making the presentation.

Miss Carrie Sue Isbell, president, was in charge of the meeting assisted by Mrs. Annetta Doggett, program chairman; and Mrs. Lloyd Morgan, secretary. The program was a style show presented by the Home-making I, II, and III students of Miss Isbell and Mrs. Myrdred Simpson under the caption of "Who Says Education is Old-Fashioned". Forty-five girls were in the style show, assisted by five boys who did a "take-off" on fashions.

During the business meeting, the nominating committee was elected to present a slate of nominees for office in the organization in 1972-73. The committee consists of Mrs. Lloyd Morgan, Mrs. C. O. Synatzske, and Mrs. Darrell Young. B. F. Harbour gave the invocation.

Special guests of the February meeting were former recipients of the Life Membership in P.T.A. work for distinguished service to the Rogers Public Schools and in P.T.A. work.

They were, in the order of the years in which they received the honor: Mrs. Woodrow Chervenka, 1958; Mrs. C. O. Gunter, Mrs. John Barfield, Mrs. Floyd Frits, Darwin Schwertner, J. H. Merka, Mrs. E. A. Smith, Jr., B. F. Harbour, Charles Conner, Mrs. Darrel Henson, Johnny Chervenka, Mrs. Edwin Psencik, Mrs. Ernest Schiller. Mrs. Frits pointed out that this is the 75th anniversary of the National Congress of Parents and Teachers.

# COUNTY NEWS

## Sharp- Tracy- Fr'ship

By Mrs. Leroy Guillote

Mrs. Blanche Mitchum is back home after being in Irving for several weeks.

Mr. and Mrs. Howard Coffman are visiting in Frisco and Plano with their daughters.

Edna Rinn visited her son and family in Austin. Mr. and Mrs. Emory Brockenbush spent last weekend in Crosby with their daughter and family, Mr. and Mrs. Troy Locke and children.

Mrs. Mattie Brockenbush spent the week-end in Rockdale.

Mr. and Mrs. Floyd Cryer of Baytown are visiting his mother in Sharp. Mr. Val Nemec celebrated his birthday Saturday.

## 2 Women Appointed To Special UT Posts

AUSTIN

Two women faculty members at The University of Texas have recently been appointed to posts in predominantly male domains at UT Austin.

Associate Prof. Elizabeth Lanham has been appointed chairman of the Management Department, the first woman ever to serve as a department chairman in the UT College of Business Administration.

In the College of Engineering, Mrs. Margaret Baker -- an assistant professor of engineering graphics -- was named associate engineering counselor. She is the first woman in the 40-year history of the engineering counseling office to hold that position and perhaps one of the first anywhere.

## Positions Open In State Agencies

There is a continuing need for qualified clerk-typists, secretaries, and stenographers in the state agencies served by the Merit System Council, according to Russell E. Shrader, director. He said that there are numerous vacancies for these workers in the Austin and Central Texas areas.

These positions will be filled from registers established through open competitive written and performance examinations which are offered each Wednesday at 1 p.m. and each Saturday at 8 a.m. at the Merit System Council office in Austin, and at least once monthly in 36 other cities throughout the state.

There are no fees for applying, for taking the examinations, or for securing any position through the merit system.

Minimum qualifications for clerk-typist I positions include high school graduation and typing at 35 words per minute. The salary range is from \$360 to \$453 per month.

Typing at 40 words per minute plus additional experience or education are required for clerk-typist II positions, and the salary ranges from \$384 to \$484 per month.

Secretaries and stenographers must be high school graduates and be able to type at 40 words per minute and take dictation at 80 words per minute.

Higher positions require increased skills and additional experience or education. The entrance salaries range from \$384 to \$468 per month.

Interested candidates should contact the Merit System Council, 507 Brown Building, P. O. Box 1389, Austin, Texas 78767. The Merit System Council serves equal opportunity employers.

## Construction Moves On FB Office

Construction was well under way this week on a building for the Milam County Farm Bureau which is located on a site just north of the Southwestern Bell Telephone Company on Travis Street.

The building, newest addition to Cameron's downtown business section is one story, 30 feet wide by 60 feet long, and has 1,800 feet of floor space. It will be of brick veneer construction with cedar shake overhang on the front, and with a wood shingle roof.

On the interior the structure will have a reception foyer, a secretary's office and two other offices, a supply room, kitchen, and a meeting or conference room. And the building will be air conditioned.

Location is on a 50 foot front lot that extends from Travis through to Crockett Street. Plans call for the grounds to be landscaped.

Cost of construction will be approximately \$23,300.

The building is expected to be completed and ready for occupancy by the Milam County Farm Bureau in April. Their present offices in a building in the 100 block of West First Street is scheduled for remodeling as part of the urban renewal program. Plans are being made for an open house following their move to the new quarters.

## Area Boys To Scramble

Local and area FFA and 4-H Club members will be participating in the world's largest calf scramble during the 1972 Houston Livestock Show and Rodeo at the March 2nd performance.

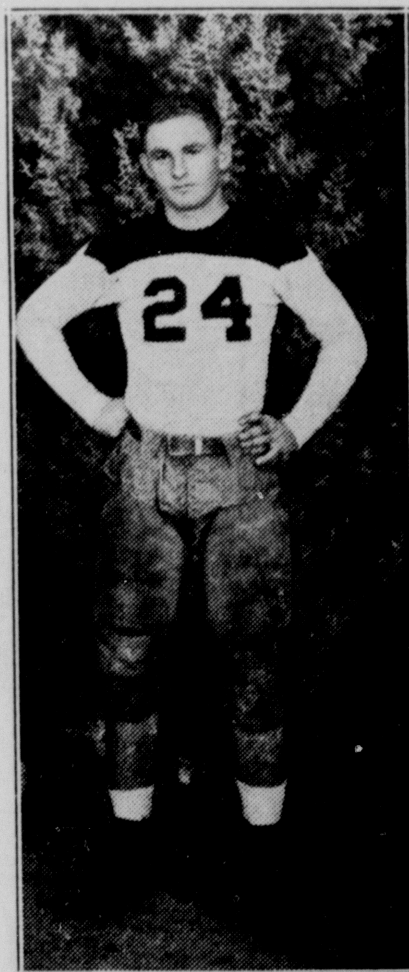

They are: Brian Cobb, David Ehler and Gery Hollas, Cameron 4-H Club members; Harold Gaas, Buckholts FFA member; and Weldon R. Schiller, Burlington FFA member.

The Calf Scramble is one of the all-time favorite events with young and old alike at the Houston Livestock Show and Rodeo.

### Siding Needs Proper Nails

Good nails and nailing practice are vital in proper application of wood siding. It's important to choose rust-resistant nails with the proper point to reduce splitting.

Galvanized or aluminum nails are corrosive-resistant and will not discolor or stain the siding.

For best possible holding power with least splitting, a blunt or medium diamond point and a blunt or medium needle point with threaded shank are recommended.

### FOR SALE--

FOR SALE - Highly fertilized coastal bermuda hay, W. P. Hogan, Gaither Motor Co., Rockdale, Texas a/c 512-446-3433

Herald Classifieds Don't Cost - They Pay!

# America the Dangerous.

Where 200,000 miles of obsolete highways  
lie ready to take your life--unless...

unless you join the drive for safer roads. You pay license fees and gasoline taxes. You deserve something better than narrow lanes, blocked visibility, dangerous curves, and other hazards that can claim your car. And maybe your life. Right now, America has about 200,000 miles of substandard primary highways. Designed and built many years ago they're far from adequate for today's motoring needs. Ride them

with extra care. Money is available for road upgrading. But threats are being made to divert this money to other than highway uses. Contact your local highway officials. You owe it to yourself, and many others, to take action. This doesn't have to be America the Dangerous...unless you want it to be.
